

I have been enjoying my experience with satellite radio for over 1 year now. During my year of using XM I was really disappointed that I could not traffic or weather updates.

I was frustrated with the attempt to make morning radio a 'Talk' radio format. No matter which station I decided to listen to it was the same old story. Day after day some Disc Jockey(s) ranting and raving about some mundane subject.

Satellite, specifically XM gave me choice. I like listening to the music I choose on the way to and from work. I can get traffic and weather updates at the push of the button and go back to my selection. Whether music, news or sports reporting, I have the choice and not a programming director.

I feel the instant traffic and weather reports add to the satellite radio experience. With or without the change I would still listen to my satellite radio; though I do feel it serves the public interest to have access to such information.

Thank you for taking the time to listen to my concerns.
